The Working Group's paper on "Strategy for Handling Nuclear Test Ban Issues at the CD" was the subject of the Interagency Group meeting. The paper was remanded to the Working Group for discussion of a number of additional suggestions made by one agency. The co-chairman underscored that these suggestions should have been made earlier in the process and that the paper was already overdue to the NSC. After disposition of the additional suggestions, the revised paper will be recirculated for final clearance and expeditious transmittal to the NSC.

Further input to the paper was volunteered on the pace and cost of intelligence improvements that would be necessary to significantly better our ability to monitor a nuclear test ban, and the group agreed that the paper would profit from a summary highlighting the principal differences that remained among agencies.
